## Colour Management Policy

Benson Box operates a colour management system that meets the requirements of the ISO12647/2 BPIF guidelines Feb 2010.

It is our policy to ensure compliance through putting in place appropriate business systems, process controls, training and development. Our aim is to ensure customer satisfaction through accurate colour reproduction and consistent colour appearance against calibrated proofs for all jobs produced to the ISO12647/2 standard.

We will ensure that we control the following elements of our system, maintain records of measurement including, where appropriate, calibration for the following

- Colour viewing lighting to ISO 3446
- Digital colour management workflow
- Digital proofing to ISO 12647/7
- Pre press colour profiles
- Process inks to ISO 2846/1
- Plate making
- Print process controls
- Training and Development

This policy will be communicated within the business and to other interested parties.

Mike Owens – General Manager
